Course Target	Undergraduates interested in politics and able to meet the requirements of a university level course in English.
Course Objectives and Overview	<p>We will begin by studying the rebuilding of Europe and the stark division of the continent following the Second World War, comparing how countries across Western Europe embraced varying combinations of liberalism and socialism while the 'Iron Curtain' sealed Eastern Europe within Communism until that system 's stunningly peaceful collapse that climaxed in November 1989 with the dismantling of the Berlin Wall. We also will trace the evolution of the European Union; despite references to the 'United States of Europe,' dating back to the earliest visions of European integration, we will study how the European Union has been developing on a fundamentally different path from the United States of America – and any other political system, for that matter. We will pay particular attention to the ongoing debt crisis that has threatened the future of the European single currency, and, some say, the European Union itself.</p>
