## Class Plan Inquiry

✚ UCH1115-01 (Spring Semester, 2015)

Initial registration date	2015-02-04 17:28:23	Last modified date	2015-03-12 13:52:41
Course Title	C programming	Credits	3
lecture room	604	Lecture time	Wed 5,6 (Fri 5, 6)

Professor in charge	Go Sang Gi	Professor in charge	College of Engineering
Lab	Computer Science Lab.	Contact	
e-mail and office hour	naram7@gmail.com		

Course Target	All Majors
Course Objectives and Overview	Understand the basic concepts and procedures of computer programming tasks Students will learn concepts, grammars, and algorithms, and develop their ability to implement applications.
Prerequisite (Prerequisite Learning)	No prerequisite Basic Computer Skills Required
Course operation method	2-hour lecture 2-hour training
Grading Method	Attendance: 10% Interim test: 35% Final Exam: 35% Programming assignment: 20%
Textbooks and References	Computer Programming Starting with C, Ho-Suk Moon, Myung-Ho Son, Hanbit Media (2012) C Programming, Kang Dong-jin and 4 others, Hanbit Media (2012)
Professor Information	Go Sang Gi (naram7@gmail.com)
TA Information	TBD
Summary	N / A

week	term	Class contents	Textbook Range, Assignment	Remarks
------	------	----------------	----------------------------	---------

1	2015-03-02 2015-03-08	Computer and Programming -Learn components and computer systems -Explore data expression method, -Study the computer programming language and its development process		(3.2) Start (3.4 ~ 3.6) Course Registration and Change
2	2015-03-09 2015-03-15	C programming basics -Examine the basic structure and characteristics of C -See, understand the concepts of constants and variables, , basic programming elements that make up the C language		
3	2015-03-16 2015-03-22	Variables and Data Types -Learn how to write constants and variables in the C language -The basic data types provided by C -Understand usage and data type conversion.		
4	2015-03-23 2015-03-29	I / O and preprocessing -I/O, the basic communication method of programming -Understand output, standard in C -Learn how to use I / O functions. -Understand the meaning of the preprocessor, -Understand the definition and function of indicators and learn how to use them.	Assignment 1	
5	2015-03-30 2015-04-05	Operator Arithmetic as the primary operator of programming; -Learn how to use relational, arithmetic, logical, increment, bit, conditional operations Understand the law of conversion between data types.		(4.1 ~ 4.3) Leave a Course
6	2015-04-06 2015-04-12	Control flow (conditional statement) -If, else, switch, etc. that define the control flow -How to define conditional control syntax -Understand the example.		(4.8) 1/3 of semester
7	2015-04-13 2015-04-19	Control flow (loop) -While, for, do, etc. that define the control flow -To define and use the iterative control syntax -Understand the example.	Assignment 2	(4.16 ~ 4.22) Interim Test
8	2015-04-20 2015-04-26	Midterm		(4.16 ~ 4.22) Interim Test

9	2015-04-27 2015-05-03	Function -How to define and call functions, and parameters Understand the definition, range rules and return values		
10	2015-05-04 2015-05-10	Function -Learn the characteristics of recursive functions and how to write them -By understanding the calling method by value, learn how to define and use functions	Assignment 3	(5.5) Children's Day (5.9) Foundation Day
11	2015-05-11 2015-05-17	Array -Learn the concept of arrays, how to declare and initialize them -Learn how to use an array as a function argument -Learn how to use multidimensional array to store and process strings -Learn character array and string standard input		(5.15) Semester 2/3
12	2015-05-18 2015-05-24	Scope and lifetime of variables -Understand the concept of local, external and global variables Understand their validity range, Understand the life cycle of static / external variables.		
13	2015-05-25 2015-05-31	String -Understand and utilize the relationship between strings and arrays and learn how to use them with various examples	Assignment 4	(5.25) Buddha's Birthday
14	2015-06-01 2015-06-07	Structures, Unions, and Enums How to use structures, unions, and enumerations Understand the structure of the function and learn how to use it.		(6.6) Memorial Day
15	2015-06-08 2015-06-14	File I / O Understand the concept of files and C Functions of I / O Functions in provided files Understand the input and output examples. in different environments	Assignment 5	(6.8 ~ 6.20) Self-Learning and Final Exam
16	2015-06-15 2015-06-21	Final Exam		(6.8 ~ 6.20) Self-Learning and Final Exam

# Course Information-Data Structure

- [Subject Outline](#)
- [Test Information](#)

## summary

Data structure is the subject of abstraction process necessary to reflect the physical values (data) measured or measured in daily life on the computer. A lot of electrical and electronic knowledge is required to store physical values inside the computer in electronic representation (electronic representation of binary digits). However, you will learn how to abstract data and conceptually represent it through data structures. Perhaps, at first, the reason or process for abstracting the data may be difficult. However, if you understand the principles and meaning of abstraction, the entire contents of the data structure course will be understood without difficulty. The data structure course helps you understand the basic materials and information of computer science.

# Course Information-Linear Algebra

- [Subject Outline](#)
- [Test Information](#)

## summary

The first part of this course is divided into three parts. The first part explains the basic concepts of simultaneous linear equations and matrices, and the second part deals with algebraic structures called vector spaces and linear transformations. Part 3 describes some of the tools of linear algebra that are used in many fields.

Linear algebra gives us the logic to organize our knowledge. But this logical thinking ability should not be simply memorized, but gained during training to understand step by step. This course aims to develop the ability to explore and apply the basic concepts of linear algebra along with the development of such logical thinking skills.

# Course Information-Database Design and Implementation

- [Subject Outline](#)
- [Test Information](#)

## summary

Database design and implementation is a course aimed at improving practical application ability based on theories of database definition, data management, and operation process. The content of this course is to develop application knowledge related to database in terms of design and implementation of relational database by using MySQL and MySQL workbench, a design and management tool for effective modeling. This course aims to enhance the computer's application ability by experiencing and learning the whole process from the requirements analysis stage of the database to the implementation and operation.

# 6.00.1x Syllabus

Welcome to 6.00.1x! In this course you'll be learning the basics of computer programming in Python and the fundamentals of computation, as well as getting the opportunity to implement your own Python functions.

This course is offered online and we understand that there are many opportunities available to cheat. We caution you to not do so. You will learn less and only harm yourself by cheating. We ask that you review our collaboration and forum guidelines, available on the course handouts page, to understand how we expect our students to conduct themselves in this course. Additionally all students are expected to follow the edX Honor Code, available at <https://www.edx.org/honor>.

If you have a disability-related request regarding accessing an assignment or the final exam, please contact the edX Help Center [https://courses.edx.org/support/contact\\_us](https://courses.edx.org/support/contact_us) as early in the course as possible or at least 2 weeks prior to exam start date to allow time to respond in advance of course deadlines. Requests are reviewed via an interactive process to meet accessibility requirements for learners with disabilities and uphold the academic integrity for MITx.

## Grading Policy

In this course there will be many types of assignments. Your final grade will be a weighted average of the following:

- Finger exercises (available within each lecture video sequence) – 10%
- Problem sets – 40%
- Midterm – 25%
- Final exam – 25%

In order to earn a certificate for 6.00.1x, students must pass the course with a grade of C or better. The following grading breakdown will apply:

- $\geq 80\%$ : A
- $\geq 65\%$ : B
- $\geq 55\%$ : C

## Exercises and Exams

All course material will be released at 14:00 UTC. Finger exercises have no due date, but we encourage students to complete them as they view the lectures. See the Calendar tab for Problem Set due dates. Regrettably, **extensions are unavailable** for any assignment but your **lowest problem set score is dropped**.

All problem sets will be due at **23:30 or 11:30 pm UTC**. This is the Coordinated Universal Time, also known as the Greenwich Mean Time. Convert to your local time zone using an online converter such as this one:

<http://www.timeanddate.com/worldclock/converter.html>

Exams are scheduled in advance. The exams will take place online, on the course website. **Exams are timed** – once you begin during the exam period, you will have 8 hours to complete it.

- The **Midterm** will take place from July 5 (14:00 UTC) to July 9 (23:30 UTC).
- The **Final Exam** will take place from August 2 (14:00 UTC) to August 6 (23:30 UTC)

**During the exam period, the forums will be shut down.** You will still be able to read posts but you will not be able to post any questions. The honor code prohibits students from communicating with one another during the exam period in any way whatsoever – so please don't discuss the exam on any other forum, website or in person with anyone else.

## List of Lecture Topics

### Lecture 1 – Introduction to Python:

- Knowledge
- Machines
- Languages
- Types
- Variables
- Operators and Branching

### Lecture 2 – Core elements of programs:

- Bindings
- Strings
- Input/Output
- IDEs
- Control Flow
- Iteration

- Guess and Check

#### Lecture 3 – **Simple Programs:**

- Approximate Solutions
- Bisection Search
- Floats and Fractions
- Newton-Raphson

#### Lecture 4 – **Functions:**

- Decomposition and Abstraction
- Functions and Scope
- Keyword Arguments
- Specifications
- Iteration vs Recursion
- Inductive Reasoning
- Towers of Hanoi
- Fibonacci
- Recursion on non-numeric
- Files

#### Lecture 5 – **Tuples and Lists:**

- Tuples
- Lists
- List Operations
- Mutation, Aliasing, Cloning

#### Lecture 6 – **Dictionaries:**

- Functions as Objects
- Dictionaries
- Example with a Dictionary
- Fibonacci and Dictionaries
- Global Variables

#### Lecture 7 – **Debugging:**

- Programming Challenges
- Classes of Tests
- Bugs
- Debugging
- Debugging Examples

#### Lecture 8 – **Assertions and Exceptions**

- Assertions
- Exceptions

- Exception Examples

#### Lecture 9 – **Classes and Inheritance:**

- Object Oriented Programming
- Class Instances
- Methods
- Classes Examples
- Why OOP
- Hierarchies
- Your Own Types

#### Lecture 10 – **An Extended Example:**

- Building a Class
- Visualizing the Hierarchy
- Adding another Class
- Using Inherited Methods
- Gradebook Example
- Generators

#### Lecture 11 – **Computational Complexity:**

- Program Efficiency
- Big Oh Notation
- Complexity Classes
- Analyzing Complexity

#### Lecture 12 – **Searching and Sorting Algorithms:**

- Indirection
- Linear Search
- Bisection Search
- Bogo and Bubble Sort
- Selection Sort
- Merge Sort

#### Lecture 13 – **Visualization of Data:**

- Visualizing Results
- Overlapping Displays
- Adding More Documentation
- Changing Data Display
- An Example

#### Lecture 14 – **Summary**

# Course Information-Life and Statistics

- [Subject Outline](#)
- [Test Information](#)

## summary

This course examines how information is generated, how it is processed, and ultimately, useful information for those new to information statistics. This lecture focuses on the application of statistics in social science, medicine and quality control, including the understanding of various statistics that are frequently encountered in newspapers, TV, and everyday life around us.

# Course Information-Introduction to Data Science

- [Subject Outline](#)
- [Test Information](#)

## summary

With the advent of the age of knowledge and information, the role of data scientists who can grasp the value of data and use it correctly is very important. In this course, students will explore the concepts of data and data science, and learn the basic skills that a data analyst should have. The objective of this course is to cultivate the basic ability to become a data scientist who wants society by conceptually arranging how to understand and analyze data and learning through examples.

## Medium name

- Multimedia lesson

## Service schedule

- Additional updates every Monday during the semester.

## lecture content

- Multimedia lesson

Count	Lecture Topic	The details	Textbook Pages	Professor in charge
1	Data and Data Mining	1.1 Data.	1-16	
2	Big Data and Data Science	1.2 Data science, data scientists.	16-30	
3	A convenient world created by data scientists	2.1 Introduction.2.2 Convenient Society.	31-43	
4	A safe and secure society created by data scientists	2.3 A healthy society.2.4 Safe Society.	44-60	

<b>Count</b>	<b>Lecture Topic</b>	<b>The details</b>	<b>Textbook Pages</b>	<b>Professor in charge</b>
5	Data structure and storage	3.1 Structure of the Data.	61-69	Youngjae Jang
6	Database	3.2 Storage of Data.	70-92	Youngjae Jang
7	Data quality management	4.1 Data Quality Management.	93-106	Youngjae Jang
8	Data analysis	4.2 Data Analysis.	107-122	Youngjae Jang
9	Data Driven Decision Making	5.1 Data Driven Decision Making.	123-139	Youngjae Jang
10	Data and Presentations	5.2 Data and Presentations.	140-154	Youngjae Jang
11	Data Visualization I	6.1 Data Visualization	155-162	Youngjae Jang
12	Data Visualization II	6.2 Implement Data Visualization.6.3 Successful data visualization.	163-206	Youngjae Jang
13	Data Mining I	7.1 The role of data mining in data science.7.2 The concept of data mining.7.3 Areas of Data Mining.	207-218	Youngjae Jang
14	Data Mining II	7.4 Data Mining Techniques and Tools.7.5 Data Mining Application Examples.	219-248	Youngjae Jang
15	Role and prospect of data scientist	8.1 Required Capabilities of Data Scientists.8.2 Ethics of Data Scientists.8.3 Prospects of Data Science and Data Scientists.	249-265	Youngjae Jang

# Course Information- Understanding of Media Psychology

- [Subject Outline](#)
- [Test Information](#)

## **summary**

Understanding Media Psychology deals extensively with the impact of media and media content on people's psychology. I hope this lecture will help you understand how media and human psychology interact and influence each other. Based on this, I hope to broaden the overall understanding of the media and human beings.

## Class Plan Inquiry

POL2101-01 (Semester 2, 2012)

연세대학교  
YONSEI UNIVERSITY

Initial registration date	2012-08-01 02:45:21	Last modified date	2012-08-04 02:19:38
Course Title	Ancient Medieval Western Political Thought	Credits	3
lecture room	Yeon313	Lecture time	Tue 9, Thu 7, 8
Professor in charge	Deokcheon Kim	Professor in charge	College of Liberal Arts
Lab		Contact	016-772-8298
e-mail and office hour	alias-remigius@hanmail.net		
Course Target	All students at Yonsei University with a passion for academics and ideas.		

Course Objectives  
and Overview

Everyone wants to be happy, so politics also aims at human happiness. Political ideology or philosophy is simply an idea of politics, and it is the reasoning and deliberation to maximize the common good and happiness

of the members of the social community.

Politics generally implies the use of power at the national level, which is the best typical

social group that exerts more dominance than any other community, as long as there is no

systemic government of the whole world.

The state of governance and system has been recognized as one of the key conditions in determining

the well-being of individual members, if not all, in the human history. In pursuit of better development

in nature, we need to know whether a governmental structure of the State is needed, what is the political system

of the ideal state, and what is the difference between the ideal political system and the reality of the

Republic of Korea, and thorough analysis and synthesis will be necessary.

This is because development is no different from the process of bringing reality or phenomena into harmony with ideals or essence.

Political philosophy is philosophy before it is political science.

This is because philosophy, regardless of the East or the West, is the source of all academic inquiry in its origin.

Aristotle's <Politika>, for example, is mostly about a political philosophy, while is recognized as the first political work of the West.

Also, on <Ethika Nikomacheia>, one of his representative philosophical works, the discussion is based on the clarification of personal and social ethics.

Introducing philosophy and understanding the implications of philosophy is the most reliable way to practice philosophy and it must lie in the path of the history of philosophers.

This is because the history of philosophy continues to accumulate long-standing and disregarded experiences since the dawn of human culture, carrying out a refinement of them.

However, the study and education of political thought in the political departments of leading universities

in Korea is crippling by setting the starting point of discussion at the modernity with Niccolò Machiavelli.

This situation is not only a disregard of a large part of the human experience, which can not be ignored, but also a sad folly of simply overlooking the noble and daring idealistic tradition.

Modern political ideology is obviously indebted to the great research achievements of the early middle ages, and for many researchers, modern contemporary ideology may not be a vestibule that thoroughly overcomes the middle ages political philosophy.

Ancient and medieval thoughts never remain in naive primitive intuition.

The philosophy of the ancient and middle ages devalues them as much as possible and calls them a monotonous list of symbolic, theoretical, and analogous elements,

but is already preoccupied with anticipating the general development of modern and modern ideas.

The link between modern and modern philosophy is loose, but ancient times and the Middle Ages show us a single system of thought that has a whole unity.

For the junior politics of this semester will have a critical opportunity to enjoy the value and power of Western ancient- and middle-aged political ideology in which classes are being forcibly oblivious to oblivion.

Hope to have a place of worship of the beauty of ideas that we are missing today.

Prerequisite (Prerequisite Learning)	Unnecessary.
Course operation method	Lectures and presentations and the maximum free discussion!
Grading Method	<p>* Attendance (10%) + Participation (20%) + Presentation (20%) + Report (20%) + Final exam (30%)</p> <p>* There is no intermediate test.</p> <p>* The final exam is written essay and the problem will be announced in advance.</p>

Summary	This seminar surveys some of the major themes and canonical texts of modern liberalism. Although roughly following a chronological order, the course is topically constructed. The first week presents the uniquely modern way of looking at the relationship between statecraft and soulcraft, and the dilemmas and challenges it poses. The first half of the course explores the development of liberalism understood as a way of coping with modernity. Drawing from Hobbes, Locke, Kant, and Mill, we will discuss such topics as reason and revelation, the social contract and popular sovereignty, moral pluralism and political tolerance, authority and legitimacy, negative and positive liberty, rights versus good, history and progress, and empire, nation, and civil society. The latter half of the course interrogates liberal modernity by engaging with Rousseau, Burke, Hegel, Marx, Nietzsche, and Weber, in which we will examine issues like alienation, revolution and class, reason and rationality, society versus community, power and knowledge, and disenchantment of authority. During the last week, we will revisit this master narrative and discuss it in light of the contemporary theoretical development. No prior exposure to political thought is presumed.

## Class Plan Inquiry

✚ POL1004-02 (1st semester of 2011)

Initial registration date	2011-01-20 11:02:33	Last modified date	2011-01-28 14:30:40
Course Title	Introduction to Political Science	Credits	3
lecture room	111	Lecture time	Tue 4, Thu 6, 7

Professor in charge	Jin Young Jae	Professor in charge	Political Science and Diplomacy
Lab	Yeonhee Hall 206	Contact	2942
e-mail and office hour	Eunho Cha (eunho.cha@gmail.com)		

Course Target	All students interested in politics
Course Objectives and Overview	<p>All social scientists need to have a rational view of society and a rationale for criticism. This course intends to transcend simple introduction of subject of "Political science and International Studies" or "Diplomacy".</p> <p>The purpose of the subject is to introduce the basic content and logic of social science. Humans living in modern times ,whether you are a science student, an engineering student, a humanities student, a social science student, need their own vision of world on common human values, philosophical systems, and principles that revolve around this world. For this, based on political diplomacy and theoretical frameworks, we cover salient issues of the broader modern society with the context of reality and theory together.</p>
Prerequisite (Prerequisite Learning)	
Course operation method	Proceed with lectures and Q & A with the professor.
Grading Method	<p>Relative evaluation. Midterm (30%), Final (40%), Attendance (30%) 2 points per penalty).</p> <p>* Two things to note: The surrogate attendant in question is F without exception.</p> <p>Surrogate attendance refers to both a substitute attendant and a student who answers</p> <p>All; When determining the grade, the first person to take the course is prioritized than the ones who retakes the course.</p> <p>Students who do not agree to these two terms must withdraw before or after enrolling.</p> <p>During the course change, you should meet with your professor or assistant for discussion.</p>

---------------	---

Course Objectives and Overview	<p>This course presents the long-term perspectives of regional order in the course of historical change in East Asian international politics. The significance and importance of the major events that led to regional order change, with an eye on change.</p> <p>The main emphasis of this course is the question of what synchronic view we will have about the process of change in East Asian regional order, and what framework of discussion in the field of international politics to track such changes in regional international politics.</p> <p>In addition, this paper examines in what context and in what mechanisms the drivers that caused the dynamics of stability and instability in regional international politics. Korea's diplomatic relations were affected by the changes in East Asian international relations. The period that this course will cover is from the beginning of the 19th century, when the East and West collided, to the early 1950s, when the Cold War was settled. However, the ultimate goal of the inquiring Korean and East Asian international relations subjects is to broaden the understanding of history and the underlying inherent in the process of dynamic change in East Asian international politics that is going on around the Korean Peninsula today.</p>

## Class Plan Inquiry

POL3152-01 (Semester 2, 2012)

Initial registration date	2012-07-29 01:46:14	Last modified date	2012-08-11 04:17:52
Course Title	Comparative Constitutional Politics	Credits	3
lecture room	Yeon 308	Lecture time	Wed 2, Fri 3, 4
Professor in charge	Junghwan Kim	Professor in charge	Graduate School of Law
Lab	Gwangbok Hall 106	Contact	010-3243-9557
e-mail and office hour	circlekjh@nate.com / Before and after class, please make an appointment		
Course Target	<p>In principle, this course is for students of Political Science and Diplomacy. This course is especially helpful for students who wish to enter the Graduate School of Law or want to learn the basic theory of Public Law.</p> <p>If there are a lot of students who want to take the course, we will give priority to the students of political science and diplomacy who took the LEET exam to enter the Graduate School of Law.</p>		

Course Objectives  
and Overview

1. The choice of comparison as a method of study aims to accurately understand "what we are now" through differentiation and similarity.

Main purpose of this course is to understand the position of constitutionalism

which places the Constitution and the rule of law at the center of political thinking and practice through the method of comparison .

So in the class, we study several constitutional cases of the United States, Japan, and Germany.

(For example, the Marbury v. Madison case in the United States is important case

to understand the judicial review system.

And important example of understanding the private system,

Discussion regarding Article 9 of the Constitution of Japan, which focuses on prohibiting

the holding of the Navy and Air Force and other forces for international peace,

and not acknowledging the right to engage in national engagement, provides an important

starting point for discussions

regarding the norm and constitution and the interpretation of the Constitution.) This course will help you understand the concept of constitutionalism and the

interrelationship between constitutionalism and democracy in terms of harmony and conflict.

2. Understanding the meaning of constitutionalism as a political student should not stop at knowing the concept of constitutionalism as ideology.

Knowing only the concept of constitutionalism without knowing what our

constitutional order and what our rule of law have, we only know the shell of constitutionalism.

Therefore, in this class, we will explain to students the basic theory of our

Constitution and administrative law so that students can really understand the meaning of constitutionalism and the rule of law.

In other words, through the basic theory of public law, I want to give an opportunity to

understand the normative nature of studying law, for social science students who did not come into contact with the law,

and give a chance to think over the law in the future as a career path as well.

Regarding the Constitution, there would have had many opportunities to learn the theory of governance

through other curriculum of existing political diplomacy. Therefore, this class will focus on the basic theory of the Constitution,

focusing on basic rights theory,

and will also explain the basic theory of administrative law in order to examine the

concrete aspects of the rule of law.

The principle of administration is the fundamental value of our country's operations, so it is necessary to study the basic theory of administrative law.)

3. Our constitutional order is built through fierce struggle historically.

It is the "image of our lives" with the distress of many people. I hope that through this class, students can understand that the law

does not exist far away, but exists in our lives,

and knowing the law gives us a good power in social life. I hope that the value of "law" is not a shield

for the ruler's power and for the protection of the interests of certain groups,

but a means to protect the freedom and human rights of the people and a way to realize freedom and equality.

Prerequisite (Prerequisite Learning)	<p>There are no prerequisites. However, the content of the class is an extension of the "Law and Politics" course which was held in the first semester of 2011 and the first semester of 2012.</p> <p>This semester, we will focus on basic rights cases and current affairs that were not covered in law and politics.</p> <p>If you have taken the "Law and Politics" class, you are welcome to deepen and supplement the course content. Even students who have not taken this course will not have a problem with this class.</p>
Course operation method	<p>This class consists of 1.lecture 2.discussion 3.assessment and exchange of opinions.</p> <p>1. Basic knowledge will be delivered through my lecture. Class time is limited Because there is so much to lecture, there are no personal presentations and group projects.</p> <p>2. Law is not in a textbook, but a picture of our lives. We will spend about 30 minutes every Friday discussing the legal issues of our lives. The discussion may be limited depending on the size of the students, but still, we will revitalize the discussion considering that this class is a major in political science and diplomacy The discussion will also take place on the YSCEC bulletin board.</p> <p>3. Students will have a chance to talk directly with me about the assignment. For an hour after class, I would like to have a conversation with several students. It can be about the evaluation of the assignment, the contents related to the class, or other contents outside the lecture are also good with me.</p>
Grading Method	<p>Grading is based on 1. midterm and final exams 30% respectively 2. attendance 10%, 3. discussion And 10% of class participation and 4. 20% of assignments.</p> <p>1. The midterm and final exams will be a combination of multiple-choice and essay writing.</p> <p>2. Attendance will be assessed by deducting two or more absences.</p> <p>3. Please engage in the debate, be eager to comment on different topics I will present to YSCEC. If you participate actively, discussions and class participation will be given a perfect score. I hope all students will receive a perfect score in this section.</p> <p>4. There are two assignments.The first task is a cover letter. It is a task to introduce yourself and to design your future life goals. The second task is to write a speech on a specific issue assuming you are running for the presidential election of the Republic of Korea. The second semester of 2012, with this class, is the time of the presidential election. let's have a chance to think about what to think about as the leader of the Republic of Korea ourselves.A detailed description of the assignment will be given again in class.</p>

Textbooks and References	<p>1. There is no designated textbook. For what I covered in class I will upload a summary in YSCEC. It will be helpful for your review.</p> <p>2. In regard to the Constitution and the Administrative Law, any textbooks on the market can be used as a textbook. You should review it carefully so that you can understand and follow the lessons.</p> <p>3. For the Constitutional Court decision and court case I refer to in class, you should find the full text and read it (see Constitutional Court, Supreme Court homepage).</p> <p>4. We need to actively study the problems of reality not listed in the textbook. I recommend to subscript weekly newspapers (Sisa IN, Hankyoreh 21, weekly shipbuilding, weekly trend, etc.) of your choice</p> <p>5. On Opinion pieces based on legal thinking [Constitution and Future, Co-Wang Kang et al., Human Love] is recommended. To understand the US Constitution, see The Federalist Papers / Alexander Hamilton, John Jay, James Madison, Leading Constitutional Decisions, Robert F. Cushman and [History of the United States Constitution and Human Rights, Ho-Soon Jang, and Gae Won Plateau]. The relation between constitutionalism and democracy, and the meaning of constitutionalism [21] , co-authored by Kim Young-min, Human Love], [Constitutional Debate-Democracy vs. Constitutionalism, Hasebe Yasuo] Co-author, Kim Il-young translation, Nonhyeong], [Constitution, Lee Kuk-un, Book world] is recommended. To understand the general theory of administrative law easily, [Introduction to New Administrative Law, Hong Jeong-sun, Park Young-sa], [General Administrative Law, Kim Seong-su, Hong Mun-sa] is recommended.</p>			
Professor Information	<p>I completed Bachelor's degree in Political Science and Diplomacy at Yonsei University. I studied for 1 year as an exchange student at West Virginia Wesleyan College. I have completed a master's and a doctoral degree from the graduate school law department, Yonsei University. Currently, I am a research professor at Yonsei University Graduate School of Law I am very interested in the relations between the state and the people, and in particular, administrative action, welfare and human rights. Also, I was selected for the Human Rights Lecturer's training course and completed the entire course and worked as a lecturer. We believe that the important values of law and politics are the guarantee and extension of human rights.</p>			
TA Information	<p>If you have any questions regarding class or attendance, please talk to me directly.</p>			
Summary	<p>Comparative constitutional politics-The objective of this course is to provide a fundamental understanding of public law and constitutionalism. Korean required</p>			
week	term	Class contents	Textbook Range, Assignment	Remarks

1	2012-09-03 2012-09-09	<p>* The first hour is a guide to the class. We will talk about the purpose of this course, the difference between political science and law and the perspective of law as a political student, the characteristics and study of law subjects, the meaning of constitutionalism, and the meaning of justice as an ideology of law. Students are encouraged to attend the first class. Every Friday there are discussions about current affairs and related laws for 30 minutes.</p> <p>* Below is a brief introduction to the themes . we want to cover in the class (some of which may be omitted.)</p> <p>* With regard to each time, we will introduce abundantly the leading cases among Korean and foreign precedents so that students can feel the law more closely. POL3839-01 (Semester 1, 2013)

Initial registration date	2013-01-28 13:47:00	Last modified date	2013-01-28 13:47:00
Course Title	International Migration Politics	Credits	3
lecture room	YHH112	Lecture time	Wed 5, Fri 5, 6

Professor in charge	Seo Jung Min	Professor in charge	Political Science and Diplomacy
Lab	YHH116	Contact	2123-2947
e-mail and office hour	jmseo@yonsei.ac.kr TBA		

Course Target	Advanced Undergraduate Students
Course Objectives and Overview	<p>We frequently call today as the age of migration. Though migration has always been an important socio-political aspect of domestic and international politics since the beginning of modernity, the advent of neo-liberal globalization followed by the end of the Cold War triggered massive influx and outflow of populations in extremely diverse directions. Now, immigration is not an exclusive issue of western or former colonial powers. Every corner of the globe is receiving huge number of immigrants. The nature of immigrants also became extremely diverse. Americans and Japanese retirees are heading toward central American countries or Southeast Asian neighbors. Vietnamese emigrants are heading toward Japan, South Korea and Taiwan. You can witness all kinds of ethnic groups in big cities in Middle East. This course aims to explore various movements of people today. In addition to readings on traditional forms of migration (third world-&gt; first world; post-colonial societies-&gt; former colonial countries), we will investigate non-traditional types of population movements such as transnational families, global capitalists, south-south immigration, international marriage etc. While investigating key features of contemporary migrations, this course will engage with key political issues generated by international migration. Especially, we will focus on international migration's impacts on nation states, sovereignty, citizenship, political spaces and minorities.</p>

Prerequisite (Prerequisite Learning)	None
Course operation method	Attendance and Class Participation (10%) Mid-term (35%) and Final exam (40%) Presentation (15%) Each student will make one presentation during the semester. The presentation is limited to about twenty minutes. After each presentation, the class will have group discussions lead by presenters. Students should submit a written report (five to six pages) which will be submitted to the instructor in two weeks after the presentation. Topics and themes for presentations will be announced in the second week.

---------------	--

Course Objectives and Overview	<p>In Korea, research on national security and national information has not been very active. This is because discussions of national security and national information have been underway since the North-South division and the Cold War.</p> <p>In particular, while national security and system security are identified, this phenomenon is intensified.</p> <p>. For this reason, most people do not believe that national intelligence agencies as a central agency to national security. but a political inspectorate for security rights. But internally, the progress of democratization, and the advent of the post-cold war externally, requires new perceptions of national security and national information.</p> <p>In particular, the end of the Cold War obscured the notion of enemy and allies, and broadened the concept of national security.</p> <p>. It is hard to understand.</p> <p>Existing national security concepts include dynamic new landscapes of post-cold war, globalization and democratization. According to these internal and external changes, the purpose, function and role of the national intelligence agency is changing radically.</p> <p>On the basis of this realization, this course deals with the concept of national security that is becoming wider and the correlation between parts.</p> <p>Basic purpose of the course is to try.</p> <p>to analyze the relationship and comparatively examine the theory and practice on the link between national security and national information. Especially in the case of Korea, the existing academic discussions and literature are minimal, this course will help opening up a new field</p> <p>to point out the greater meaning of the class. This lecture is not only about theoretical discussion.</p> <p>It includes case analysis to improve understanding of national security and national information, and through student presentations, to inspire the students to participate.</p>
Prerequisite (Prerequisite Learning)	none
Course operation method	Lecture, presentation, discussion
Grading Method	<p>Grading</p> <p>-30% midterm exams, 40% final exams, 30% presentations, assignments, and attendance</p>

Initial registration date	2014-06-23 10:38:39	Last modified date	2014-06-23 10:38:39
Course Title	POLITICS OF COLLABORATION AND INTEGRATION IN EUROPE	Credits	3
lecture room	YHH313	Lecture time	Tue 7, Thu 8, 9

Professor in charge	SCHATTLE HANS	Professor in charge	Political Science and Diplomacy
Lab		Contact	
e-mail and office hour			

Course Target	Undergraduates interested in politics and able to meet the requirements of a university level course in English.
Course Objectives and Overview	<p>We will begin by studying the rebuilding of Europe and the stark division of the continent following the Second World War, comparing how countries across Western Europe embraced varying combinations of liberalism and socialism while the 'Iron Curtain' sealed Eastern Europe within Communism until that system 's stunningly peaceful collapse that climaxed in November 1989 with the dismantling of the Berlin Wall. We also will trace the evolution of the European Union; despite references to the 'United States of Europe,' dating back to the earliest visions of European integration, we will study how the European Union has been developing on a fundamentally different path from the United States of America – and any other political system, for that matter. We will pay particular attention to the ongoing debt crisis that has threatened the future of the European single currency, and, some say, the European Union itself.</p>
Prerequisite (Prerequisite Learning)	
Course operation method	<p>25 percent midterm exam  25 percent final exam  25 percent simulation activity and papers  25 percent attendance, assignments and class participation</p>

Grading Method	<p>Letter grades will correspond with the following totals:</p> <p>A + 97.0 – 100  A 93.0 – 96.99  A- 90.0 – 92.99  B + 87.0 – 89.99  B 83.0 – 86.99  B- 80.0 – 82.99  C + 77.0 – 79.99  C 73.0 – 76.99  C- 70.0 – 72.99  D + 67.0 – 69.99  D 63.0 – 66.99  D- 60.0 – 62.99  F 0 – 59.9</p> <p>A note on the final course grade: students in borderline situations with exceptional attendance and class participation records will be boosted to the next highest grade.</p>			
Textbooks and References	A reading packet will be available at the copy center in Yeonhui Hall.

## Class Plan Inquiry

YCC1202-07 (1st semester of 2011)

Initial registration date	2011-01-06 17:32:16	Last modified date	2011-05-25 16:23:39
Course Title	Advanced College English	Credits	2
lecture room	Species311	Lecture time	Wed 6 Fri 6

Professor in charge	Janoli Michael	Professor in charge	Undergraduate University
Lab	Baekyanggwan 512	Contact	2123-3435
e-mail and office hour	michaelzanolli@yahoo.ca; W / F: 5-6: 00; TH: 2-3: 00;		

Course Target	This course targeted at students with advanced writing abilities.
Course Objectives and Overview	This course will enable students to become familiar with both the reading and writing processes. Students will practice comprehending the text using various reading skills and analyzing and evaluating the text from a critical perspective. Also, understanding of the structure of a paragraph, essay and rhetorical modes will enable students to apply their critical reading skills in organizing their ideas into coherent and cohesive writing. Through these practices, students will become both critical readers and effective writers.
Prerequisite (Prerequisite Learning)	
Course operation method	Students will be doing a variety of in and out of class writing and reading assignments. Students will also undertake a reading project as homework.
Grading Method	Attendance-Preparedness: 10%; In-class activities and homework: 25%; Reading-Writing Project: 15%; Reading and Writing Assessments: 30%; Two Compositions: 20%;
Textbooks and References	The text for this class is Creating Meaning, Advanced Reading and Writing by Laurie Blass, Hannah Friesen and Kathy Block.

Professor Information	Hi. My name is Michael Zanolli. I have lived in Korea for the past thirteen years and have been at Yonsei for ten. I have a dual BA in Philosophy and English Literature from Syracuse University in the United States and an MA in English Literature, also from Syracuse University. In my free time, I enjoy reading, listening to and performing music, and watching movies. See you in class.
TA Information	There is no TA for this class.
Summary	The syllabus will revolve around the book and is subject to change.

Professor in charge	McLaren Debra	Professor in charge	Undergraduate University
Lab	Baekyangwon 501	Contact	2123.4842
e-mail and office hour	maclellandj@hotmail.com Tuesdays 10-12pm		

Course Target	<p>Advanced College English I is an listenign and speaking course designed for freshman students (or students who have yet to fulfill the freshman English requirements) at the advanced level</p> <p>Student Outcomes:</p> <p>Listening:</p> <ol style="list-style-type: none"> <li>1. Students will listen for gist (on extended audio)</li> <li>2. Students will listen for detail</li> <li>3. Students will understand vocabulary through context</li> <li>4. Students will infer meaning through tone and influction</li> <li>5. Students will increase their listening accuracy with continued practice</li> </ol> <p>Speaking:</p> <ol style="list-style-type: none"> <li>1. Students will learn how to converse in a variety of settings</li> <li>2. Students will expand conversations</li> <li>3.Studetns will increase vocabulary in more natural fluency</li> <li>4. Students will gain confidence in speaking English</li> <li>5. Students will give presentations in English</li> <li>6. Students will communicate ideas, feelings and opinions in English in Group discussions</li> </ol>
---------------	--

<p>Course Objectives and Overview</p>	<p>Advanced College English I is an integrated, two-credit course designed to broaden the academic listening and speaking skills of students at the high and advanced levels. The course exposes students to a variety of listening and speaking strategies necessary for successful communication in academic environments, as well as independent study at a tertiary level. Students will engage interactively in discussions, debates, speeches, and presentations. They will also be required to utilize various note taking methods for extended listening. Students will be encouraged to develop cooperative learning habits by working collaboratively in pairs and small groups. Students are also expected to create their own opportunities outside class-hours to further enhance their speaking and listening skills.</p> <p>This course will enhance students' speaking and listening skills for academic purposes. Students will participate in a variety of pre-prepared and spontaneous oral / aural projects that will help them consolidate the academic speaking and listening skills necessary to cope with university-level study. They will also be exposed to longer authentic listening passages for extended periods of time. Students will listen to and take notes on live and recorded lectures and use course topics to practice speaking skills required in academic settings. Through these practices, students will become both persuasive speakers and discerning listeners.</p>
<p>Prerequisite (Prerequisite Learning)</p>	<p>Students must take the required level test in order to enroll in this course.</p>

Course operation method	<p>This course takes an integrated skills approach. Class time should focus on the productive skill of speaking with some listening skills and strategies taught explicitly. However, the majority of the listening activities and strategy reinforcement should be performed outside of class. Students are expected to actively participate in pair and small group activities. The instructors should monitor individual performance in terms of vocabulary, accuracy, and pronunciation in order to provide regular feedback.</p> <p>Students will be given homework per week. This should include out-of-class activities (ie assigned listening passages, readings, research, project preparation, and online activities) as well as other assignments related to the course. Students should come to class prepared, having completed the assigned homework necessary to participate in class discussions and activities.</p>
Grading Method	<p>Attendance / Participation / Attitude: 15%</p> <p>Homework: 10%</p> <p>Midterm: listening 15%</p> <p>Final: oral 20%</p> <p>Presentation: 10%</p> <p>English Town Listening Project: 15%</p> <p>Group Videos: 15%</p>
Textbooks and References	<p>Quick Smart English (Advanced)</p> <p>By Maurice Forger</p> <p>**** supplementary material will be provided by the teacher</p> <p>****</p>

Professor Information		<p>My name is Debra MacLellan and I will be the instructor for this Advanced College English Listening and Speaking Class.</p> <p>First let me give you some background on about my education. I have a Bachelor of arts from st. Thomas University in Canada. I have Education Courses through Hillsborough College in Tampa, Florida and I have a Masters in Education through the University of Phoenix located in Phoenix, Arizona. In addition, I have a CELTA from Cambridge University in London. I have lived in Korea since 1998 and have been an instructor of English for all age levels. I have worked at the university level for the past five years. I grew up in a small town called Mabou in Nova Scotia, Canada. Most of my family lives in Canada at the present time. There are roughly 300 families in Mabou so as many of you can guess, it's a very small town. I moved to Korea in 1998 and fell in love with it immediately. There are many things I like about Korea but in particular, the food. My favorite Korean dish is Dukalbi and I love spicy food. I also like to travel, read, hike and photography. I am interested in languages; besides English, I speak French, some Gaelic and I'm hoping to improve my Korean. I look forward to getting to know all of you throughout this course.</p>

YCB1101-05 (Semester 2, 2011)

Initial registration date	2011-07-14 14:20:04	Last modified date	2011-08-25 16:03:01
Course Title	Writing	Credits	3
lecture room	S105	Lecture time	Mon 5,6 Wed 5,6

Professor in charge	Kwang-Soo Yoo	Professor in charge	Undergraduate University
Lab	Baekyang Hall N303	Contact	
e-mail and office hour	ho1000@empal.com		

Course Target	All students
Course Objectives and Overview	Practice writing, the basis of all discipline. Practice the correct writing requirements in detail and practice the various ways of writing.
Prerequisite (Prerequisite Learning)	none
Course operation method	Instructions on how to write. Study on writing method through discussion, mutual correction and criticism Attempt various writing. Appreciation and analysis

## Grading Method

Total Score Total, Relative Evaluation, (: Assignment), (: Class Hours)

- Attendance: 20 points, bonus points and tie scores
- Discussion and class participation: 20 points

Individual free article presentation: Once per individual / +1: Prepare in advance and present in class  
Writing 3 ~ 6 times: 10 points each / during class

Book Quiz (10 points) / Read ahead and conduct in class  
Book to Read: Stephen King, On Writing , Translated by Kim Jin-jun, Kim Young-sa, 2002.

Reading, summarizing, writing table of contents (10 points) / Read ahead and submit  
Thesis to read: Jang Young-hee, Physical Disability as a Metaphor, American Studies Journal 33, 2001, pp. 185-209.

Group activities / idea notes, academic writing, presentation

Basic Topics: Religion and Science  
Group of 2 / Both students receive the same score  
'Idea Note' (20 points) / All persons on the contents of academic reports  
Data collection, single phase, commentary  
-Submit only one book per group.  
-All material on the topic (search data, summaries, statistics, drawings, etc.)  
It is integrated and made in a free way such as single phase and brainstorming.  
- 'Idea Note' mid-term inspection (5 times), final submission (10)  
Academic report (25 points)  
-Submit 'Overview' and 'References' about their content (5)  
-Submit draft academic report (10)  
-Submit the final report of the academic report (10)  
Presentation (20 points) / Present and discuss the contents of academic reports.  
-Presentation method, content and progress (10)  
Questions and Answers (10)  
-Print the completed result after the final notice and submit it before the presentation starts. (Taking in consideration)

Submit a Discussion Evaluation Form (5 points each)  
-Submitted by each student except the group giving the presentation.  
-Be sure to include the following: Each individual created a form for discussion  
Immediately after  
(Summary of presentation, feasibility and development of the thesis, features and advantages, , complementary parts, comments and comments)

☞ Bring a book review practice book and review and review.  
☞ All students must receive individual criticism. / Conducted outside of class or not attended  
Deduction  
Depending on the course, more notes or assignments may be given.  
"Yonsei University Writing Code of Ethics" should be attached at the beginning of every report.  
All. / Regulations posted on Yscec

Professor in charge	Donha Park	Professor in charge	Proteome Researcher
Lab	Academy of Sciences S305	Contact	4243
e-mail and office hour	parkdh@proteomix.org		

Course Target	Students with basic interests in life sciences: cells, genetics, DNA, evolution, diversity
Course Objectives and Overview	<p>Modern life sciences have made remarkable advances during the development of molecular biology. Based on this development, the goal of this class is to look at the characteristics of the history of living things and animals including human beings, based on basic biology.</p> <p>It will cover human cells, genetics, DNA and genetic engineering, evolution, and plant and animal diversity.</p>
Prerequisite (Prerequisite Learning)	none.
Course operation method	2 hours (overview + question and answer) + 2 hours (practice problem solving)
Grading Method	Two tests (40 points each) + practice (20 points) + class attitude
Textbooks and References	<p>Teaching Materials: Jay Phelan (2010) Life Science-Knowledge available (Kyu Ung Han), First Edition, Beommoon Education</p> <p>Supplementary materials: Kim, Eung-bin et al. (2013) Core Life Sciences, First Edition, Bioscience; Campbell Biology, 9th Edition, Bioscience</p>

Professor Information	Professor of System Biology Research Professor, Proteome Researcher			
TA Information	TBA			
Summary	Biological science has achieved big progress through development of many techniques in molecular biology. Based on basic concepts in biology, chemical aspect of life, cells, inheritance, DNA, biotechnology, evolution, diversity of life will be discussed.			
week	term	Class contents	Textbook Range, Assignment	Remarks
1	2014-09-01 2014-09-07	Life Sciences and Science Methodology		(9.1) Course Registration (9.3 ~ 9.5) Confirmation and Change of Course Registration
2	2014-09-08 2014-09-14	Thanksgiving		(9.7 ~ 9.10) Chuseok
3	2014-09-15 2014-09-21	Basic Chemistry		
4	2014-09-22 2014-09-28	Basic life, cell structure and function		
5	2014-09-29 2014-10-05	Bacteria and cages (plants, animals, mold, ameba)		(10.3) The New Year's Day
6	2014-10-06 2014-10-12	Conversion of energy for life support		(10.6 ~ 10.8) Lecture withdrawal (10.8) 1st semester (10.9)
7	2014-10-13 2014-10-19	Cell respiration and photosynthesis: why we breathe  What is the ultimate source of living and food?		(10.16 ~ 10.22) Interim Test
8	2014-10-20 2014-10-26	Midterm exam		(10.16 ~ 10.22) Interim Test
9	2014-10-27 2014-11-02	What is genetic material, DNA? and Can we know what it is?		
10	2014-11-03 2014-11-09	Growth, reproduction, multiplication of cells		
11	2014-11-10 2014-11-16	Is the life of bacteria 3.8 billion years old? elegance The process of recovery is due to cell division. Japanese Flies		(11.14) semester 2/3

12	2014-11-17 2014-11-23	Genetic Law of Meteor Organisms: Why We Are  Similar but not identical with Parents? Is mutation bad?		
13	2014-11-24 2014-11-30	Darwinism and Evidence of Evolution: The Evolution of Biology  Apart from the topic, it is a list of simple facts It is only.		
14	2014-12-01 2014-12-07	Are we the product of evolution?  What is the evidence?		
15	2014-12-08 2014-12-14	Finals		(12.8 ~ 12.20) Self-Learning and Final Exam
16	2014-12-15 2014-12-21	Finals		(12.8 ~ 12.20) Self-Learning and Final Exam

\* Important notices regarding the change of the regular semester's operation method

Class or self-study in the week where the test is not taken into account considering the mid-term period (2019.10.21.-10.25.) And the final period (2019.12.9.-12.20.) Should proceed. \* According to Article 57-2 of Yonsei University School Regulations, students with disabilities may request teaching and learning support for attendance, lectures, assignments, and examinations through interviews with their professors before and after the start of the semester. Assistance is available through the faculty or students with disabilities. Here are some examples of possible disabilities by class, assignment, and exam. (However, the actual support content may vary depending on the nature of the lecture.) [Lecture] -Visually impaired: teaching materials (digital, braille, enlarged textbooks, etc.), essay help allowed -Retardation: teaching materials (digital teaching materials), Ghostwriting and teaching assistant helper allowed, designated seating arrangements - deaf: daepil / text translator helper allowed, lecture transcripts allowed - intellectual disability / autism disorders: daepil assistant and teaching mentor allow [assignment and exam] - visual impairment / disability / deaf : Extension of project submission deadline, adjustment of assignment and submission method, extension of test time, adjustment of test questions and response method, provision of separate place, linkage of helpers, etc. -Intellectual Disability / Autistic Disorder: Submission of individualization assignment and evaluation of alternative evaluation

# Class Plan Inquiry

UCJ1129-01 (Semester 2, 2015)

Initial registration date	2015-07-30 17:19:01	Last modified date	2015-09-04 02:13:30
Course Title	Reading contemporary art	Credits	2
lecture room	S108	Lecture time	Wed 5,6
Professor in charge	Hyewon Choi	Professor in charge	Undergraduate University
Lab		Contact	010-7720-0409
e-mail and office hour	tilaca@hanmail.net		

Course Target	<p>All undergraduate classes available  There is only one condition  -This class focuses on field visits from time to time to visit exhibitions and artist's studios  Only students who can participate in these visits can be enrolled.  -Class time is set from 1pm to 2:50 pm,  but classes may be held in the open air, until evenings or on some Saturday mornings or  in the afternoon due to the limitation of exhibitions and visit galleries we can visit.  Please enroll only students who can fit in this shedule.  -Admission fees may also be incurred during field trips. (E.g., Depending on  places, the museum can be free of charge, but in the case of art museums  entrance fee will be between 2000 KRW to 10000 KRW.)</p>
---------------	---

<p>Course Objectives and Overview</p>	<p>This course called &lt;Reading Contemporary Art&gt; Not a skimming class of art history in general but digging into the relationship between art and society based on our hidden background and understanding of social situations</p> <p>I want students to understand the relationship by exploring our contemporary society and the field of contemporary art that takes place in it. The purpose of this study is to diagnose the appearance of modern society through various art phenomena. In other words, we can learn how to read society and read paintings. Furthermore, I would like to point out social issues drawn from art across the ages and spaces. In the main issue called Art Issues, we identify and understand the relationship between art and society with the examples you find. It's not just a class for appreciation of art works, and in order to grasp the issue's correlation and social background, study of humanities, and society must be explored in parallel. The main task of this course is to explore the field of contemporary art. Interview exhibitions and artists' works that can be viewed directly by team projects Assignment to introduce and present vivid contemporary art scenes through research work in the workshop should be done.</p>
<p>Prerequisite (Prerequisite Learning)</p>	<p>There are no special subjects to take. However, we take courses in the humanities and arts related fields such as history, philosophy, and society. If so, further study of the course is possible.</p>
<p>Course operation method</p>	<ol style="list-style-type: none"> <li>1. Each weekly and topical lecture will be conducted using presentation materials and video materials.</li> <li>2. Every week, students read and organize textbooks and references on art issues by topic.</li> <li>3. Discuss teaching methods and visit important exhibitions and famous museums and galleries and submit your comments.</li> <li>4. Midterm exams and final exams will be given based on the lecture content.</li> <li>5. Projects for each team is to interview work on exhibitions and works of artists It is a to introduce and present through research work such as visiting studio</li> <li>6. From time to time, the main focus will be on exhibitions and field trips to the artist's studio.</li> <li>7. Class time is set from 3pm to 4:50 pm. But classes can be conducted on-site only and are available until evening or on some Saturday mornings or afternoons. Only students who can participate in field trips are made through exhibitions and gallery visits can register</li> <li>8. In addition, during field trips, entrance fees may be incurred. ( Depending on places, the museum can be free of charge, or costs between 2000 KRW to 10000 KRW</li> </ol>

Grading Method	<p>Midterm: 10%</p> <p>Final Exam: 40%</p> <p>Team presentation: 40%</p> <p>Attendance &amp; Attitude &amp; Participation: 10%</p> <p>Midterm exam is replaced by submission of one exhibition</p> <p>Final Exam is a mixed test of slide memorization test and essay description</p> <p>Team assignments are free topics and free forms</p> <p>Relative evaluation</p>
Textbooks and References	<p>Teaching Materials: &lt;Artistic Issues&gt; / Choi Hye Won / Art Books / 2008</p> <p>&lt;Reference&gt;</p> <ol style="list-style-type: none"> <li>1.
